

WOOD STOVES AND INSERTS

Harman wood-burning products are made to deliver even heat and the longest burn times available. Distinctive designs further highlight the superior craftsmanship behind these wood stoves and inserts.

After all, every Harman is “Built to a standard, not a price.”

300i

FIREDOME TECHNOLOGY

Harman FireDome technology maximizes efficiency and extends burn times—for up to 17 hours of even heat with each load of wood. Two combustion cycles completely burn the wood, smoke and exhaust. FireDome also keeps the viewing area clean by directing airflow between the glass and the fire.

LIMITED LIFETIME WARRANTY¹

The strongest in the industry, Harman provides a limited lifetime warranty on the most important aspects: firebox and heat exchanger.

¹For full warranty details, visit www.harmanstoves.com.

Actual product appearance, including flame, may differ from image. Product specifications and pricing subject to change without notice. The images and descriptions in this brochure are provided to assist you in product selection only. BTU values based on EPA testing standards. Typically, burning cordwood will result in higher BTU rating depending on moisture content. Refer to installation manual for complete clearance requirements and specifications. Fireplace, stove and insert surfaces get extremely HOT and can cause severe burns if touched. Keep a safe distance away. To learn more visit www.harmanstoves.com/fireplacesafety.
